

*Friends, colleagues, and the editorial board of “Fundamental and Applied Mathematics” congratulate Yevgeny Vasilievich Chepurin on his 80th birthday! Yevgeny Vasilievich Chepurin is the creator and the perpetual leader of the Laboratory of Computational Methods in Probability and Statistics, the Mathematical Economics specialty at the Faculty of Mechanics and Mathematics, and the Actuarial School of the Moscow State University. He is the author of dozens of scientific papers and textbooks in these subjects. Yevgeny Vasilievich is a representative of that remarkable school of scholars who laid the foundations for modern methods of research and teaching of probability theory in Russia. He is instrumental in taking these disciplines to the world-class level. We wish you, Yevgeny Vasilievich, great health and more creative achievements!*
