**Reubs J. Walsh** is a PhD candidate in Clinical, Neuro- and Developmental Psychology at Vrije Universiteit Amsterdam. Their research interests include typical and atypical social cognition, interoception and affect, and biosocial and developmental determinants of neuropsychiatric health.

**Nikki C. Lee** is an assistant professor in Developmental Psychology at Utrecht University, Amsterdam. Her research focuses on social-emotional development during adolescence and how this enables adolescents to flexibly navigate their social environments.

**Imke L. J. Lemmers-Jansen** is an assistant professor in Clinical, Neuro- and Developmental Psychology at Vrije Universiteit Amsterdam. Her focus of research is psychosis, social interactions and the translation to real life social behavior in friendships.

**Miriam Hollarek** is a PhD candidate in Clinical, Neuro- and Developmental Psychology at Vrije Universiteit Amsterdam. Her research interests include the influence of the social environment on

the development of social cognition from infancy to adolescence and neural mechanisms associated with these processes.

**Hester Sijtsma** is a postdoctoral researcher at Vrije Universiteit Amsterdam at the department of Clinical, Neuro- and Developmental Psychology. Her research is focused on the interactions between social behavior, social networks, and the brain during adolescence.

**Mariët van Buuren** is an assistant professor in Clinical, Neuro- and Developmental Psychology at Vrije Universiteit Amsterdam. Her research is focused on the development of social cognition, underlying brain mechanisms and social functioning in adolescence.

**Lydia Krabbendam** is professor of Developmental Neuropsychology and head of the Dept Clinical, Neuro- and Developmental Psychology at Vrije Universiteit Amsterdam. Her research focuses on the development of self-regulation and social cognition in adolescence.
