In looking through our published article, we found that there is a mistake in Fig. 14, where a wrong legend was used. The authors regret very much that the incorrect version of Fig. 14 appeared in the original manuscript. The correct version of the Fig. 14 is presented here.

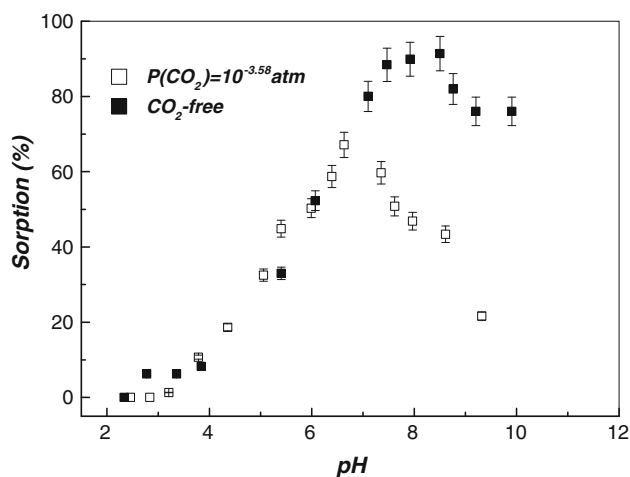

Fig. 14 Effect of CO₂ on U(VI) sorption on DCS as a function of pH values. $C[\text{UO}_2^{2+}]_{\text{initial}} = 2.86 \times 10^{-5}$ mol/L, $I = 0.05$ mol/L NaClO₄, $m/V = 0.4$ g/L, $T = 25 \pm 1$ °C. ■: CO₂-free, □: $P(\text{CO}_2) = 10^{-3.58}$ atm
