EDITORIAL 2021: Journal of Thermal Analysis and Calorimetry

Imre Miklós Szilágyi¹ · Alfréd Kállay-Menyhárd² · Sophie Korda³

Accepted: 16 November 2020 / Published online: 5 January 2021
© Akadémiai Kiadó, Budapest, Hungary 2021

Dear Readers,

2020 was an exciting year in the life of our Journal also, and we would like to thank all of you for your contributions as Authors, Reviewers, Consultants as well as Senior Associate, Associate, Honorary and Guest Editors. We are grateful to you, because your high-quality work is the guarantee for the success of our Journal.

It is a great news that the impact factor for 2020 was 2.731, which is ca. 10% increase compared to the previous year. Although the impact factor for 2019 was already a new record for the Journal, the impact factor for 2020 has surpassed it even more. The Journal is on a very good trend as our impact factor has increased 50% in the recent 5 years. The value of this impact factor increase is even more significant, taking into account that the number of papers published has increased considerably in the recent years, i.e., it has doubled since 2015.

Several special issues were also published in 2020. We continued our long-term tradition and selected papers presented at international conferences, i.e., at the 2nd International Conference on Physical Chemistry & Functional Materials ("PCFM"), at the 28th Symposium on Thermal Analysis and Calorimetry-Eugen Segal of the Commission for Thermal Analysis and Calorimetry of the Romanian Academy and 2nd Symposium on Thermal Analysis and Calorimetry of Moldova ("CATCAR28 + MoldTAC2"), as well as at the 5th Central and Eastern European Conference on Thermal Analysis and Calorimetry and 14th

Mediterranean Conference on Calorimetry and Thermal Analysis ("CEEC-TAC5 + MEDICTA2019"). We are very proud that our 2nd Journal of Thermal Analysis and Calorimetry Conference organized together with the 7th V4 (Joint Czech–Hungarian–Polish–Slovakian) Thermoanalytical Conference ("JTACC-V4 2019") was a great success and a dedicated special issue was also published. At this conference we celebrated the 50th anniversary of the Journal of Thermal Analysis and Calorimetry. In addition, several topical special issues on thermodynamics, heat transfer and nanofluids were also published, i.e., the Fundamental and Engineering Thermal Aspects of Energy and Environment ("Energy and Environment"), the Advances in Heat Transfer Enhancement Using Passive Techniques ("Passive techniques"), the Energy Savings with Heat Transfer Enhancement Techniques and Heat Exchangers ("Energy Savings-2020"), the Recent Developments of Advanced Numerical Thermal Transport in Porous Media ("AdvNum-Thermo-Poro") and the Thermal Analysis of Energy Systems ("TEAS-2020").

In 2020 we published 991 papers. The classification of the manuscripts submitted to our Journal is presented in Fig. 1. Thermodynamics has increased significantly its share, while the other major field, from which we receive thermal science-related papers, has remained materials science. The other fields maintained their relative portion.

We are very happy that the number of manuscript submitted in 2020 is expected to be around 4000 pieces. This is a huge number, and it means ca. 25% increase, compared to 2019. This shows that the Journal is becoming even more and more popular in all fields of thermal analysis and calorimetry, and thermal science in general.

This steep increase, however, is accompanied by new challenges for the future. The most important is that we have to increase our average rejection rate from 50 to 60%, which was usual for the recent years, to 80%. This also means that we need to make considerable preselection of submitted papers and we can send only 50% of them for peer review. This is essential in order to keep our progress time as fast as possible, since the large number

of submissions was accompanied by slower process time unfortunately. However, it is our mission to solve this problem and we are sure that our new preselection evaluation will help on this point.

Finally, we are sad to report that some great researchers have passed away recently, who made groundbreaking steps in thermal analysis, and who also contributed significantly to the success of JTAC. We are indebted to them to a very large extent. In March 2020 we published a series of obituaries about these outstanding scientists and our Journal and our community will keep their memory alive.

As a closing remark, we would like to wish all our contributors a Very Happy and Successful New Year for 2021.

Imre Miklós Szilágyi
Editor-in-Chief

Alfréd Kállay-Menyhárd
Deputy Editor-in-Chief

Sophie Korda
Head of Editorial Office

Acknowledgements

The Editors of the Journal are thankful to the members of our Editorial Board for their work throughout the past year.

We would like to express our special thanks to those referees listed below for their hard work, for the time and expertise they invested to improve the scientific level of the manuscripts. Their work is invaluable in terms of scientific advancement and in providing a constant dynamic forum where all scientists, from all over the world, can find a professional team helping, educating and inspiring.
