In the article entitled: “Limitations of Diagnostic Precision and Predictive Utility in the Individual Case: A Challenge for Forensic Practice” the equation at the bottom of the 1st column of the page headed Analysis is incorrect. The correct equation is as follows:

$$y_L, y_U = B_0 + B_1x \pm t_n \sqrt{\hat{\sigma}^2 \left(\frac{1}{n} + \frac{(x - \bar{x})^2}{SS(X)} \right)}$$

The equation at the top of the 2nd column of the same page is also incorrect. The correct equation is as follows:

$$y_L, y_U = B_0 + B_1x_{n+1} \pm t_n \sqrt{\hat{\sigma}^2 \left(1 + \frac{1}{n} + \frac{(x_{n+1} - \bar{x})^2}{SS(X)} \right)}$$

Springer regrets the errors.
