Erratum to: Metabolic Brain Dis
DOI 10.1007/s11011-010-9216-8

The second paragraph in the “Experimental treatment” of the Material and Methods section should have contained the following information: “One week after surgery, animals were fed for 30 days with a standard diet with casein (control) or a special diet with soy isolated protein prepared according to Franzon et al. (2005) and Reeves et al. (1993). Food intake and body weight were examined weekly. Both diets were isocaloric.”

The full reference for the above is as follows: Franzon F, Chiarani F, Mendes RH, Belló-Klein A, Wyse ATS (2005) Dietary soy prevents brain Na^+ , K^+ -ATPase reduction in streptozotocin diabetic rats. *Diabetes Res Clin Pract* 69:107–112.

Data included in Tables 1 and 2 has raised debate and should not be considered with the paper.

These corrections do not change the results and conclusions of the work.
