In section 5 pg 10 of the manuscript following equation is written:

$$\text{Gap}(k) = E^*\{\log(W_k) - \log(W_k)\} \text{ for } k = 1, \dots, k.$$

The correct equation would be:

$$\text{Gap}(k) = E^*\{\log(W_k)\} - \log(W_k) \text{ for } k = 1, \dots, k.$$

In addition to this, the following line immediately precedes the equation given above:

The ‘gap statistic’ essentially compares the change in within-cluster dispersion with that expected under an appropriate reference null distribution (which is the uniform distribution).

In this line, please insert W_k as follows:

The ‘gap statistic’ essentially compares the change in within-cluster dispersion (W_k) with that expected under an appropriate reference null distribution (which is the uniform distribution).

The online version of the original article can be found at <http://dx.doi.org/10.1007/s11027-007-9123-4>.
