The original article contained an incorrect equation in “3 Scalable feature signatures,” under the section Total Orderings. The equation corresponding to the distance function inspired by the Ward’s method missed a square in the expression and also repeated the delta symbol in the lower index. The correct equation is shown below:

$$\delta_{WL_2}(t_i, t_j) = L_2^2(r_i, r_j)(w_i w_j) / (w_i + w_j)$$
