The Editor-in-Chief has retracted this article [1], which was published as part of special issue “Multi-source Weak Data Management using Big Data”, because part of its content has been duplicated without permission from unpublished manuscripts authored by Archana Tiwari and Manisha Sharma, and by Her-Chang Chao and Tzuo-Yau Fan. The article also shows substantial text overlap, most notably with the articles cited [2, 3, 4]. In addition, there is evidence of figure duplication without appropriate permission, as well as evidence suggesting authorship manipulation and an attempt to subvert the peer review process.

The author has not responded to correspondence about this retraction.
