The Editor-in-Chief has retracted this article [1], which was published as part of special issue “Multi-source Weak Data Management using Big Data”, because its content has been duplicated without permission from unpublished manuscripts authored by R Kishorekumar and P Deepa, and by Priya Selvam and Santhi Balachandran. In addition, there is evidence suggesting authorship manipulation and an attempt to subvert the peer review process.

The authors have not responded to correspondence about this retraction.
