To the Editor:

We write to set the record straight regarding the recent article by Basu and Nair (2006) *Potential Clinical Role of FDG-PET in Detecting Sarcomatous transformation in von Recklinghausen's Disease: a case study and review of the literature*, *J Neurooncol* 80(1): 91–95. In that article the authors omitted from their reference list our article on the same topic, *Positron Emission Tomography in the Detection and Management of Sarcomatous Transformation in Neurofibromatosis*, Solomon et al., *Clin Nucl Med* 2001; 26:525. They cited

four other papers, but not ours, making their review of the literature incomplete.

Sincerely,  
Martin G. Pomper
