**Correction to: Journal of Neuro-Oncology**  
<https://doi.org/10.1007/s11060-019-03279-9>

The following discrepancies and errors were found in the original publication:

- As correctly specified in Table 1, the male PCNSL patients treated with HD-MTX made up 46% of that group (not 54% as specified in the **Abstract** and the text of the **Results** section).
- As correctly specified in the **Results** section (Table 2 and text), the average first detected WMC score was 0.8 ( $\pm$  0.9) (mean,  $\pm$  SD) in the HD-MTX group; not 1.5 ( $\pm$  0.6) as specified in the **Abstract**. Also, the term ‘non-zero’ in the **Abstract** and in the text of the **Results** section should not have been used here.
- As correctly specified in Table 2, the p-value for the Overall WMC score is 0.0048; not 0.04 as specified for the average WMC score in the text in the **Results** section.
- In the first column of Table 2, the word ‘years’ in the bottom entry should read ‘months’.

- In the **Results** section, the second sentence in the second paragraph should read as follows: "Median time to detect WMC was shorter in the HD-MTX-R group compared to the HD-MTX group".
