In this article, we used inaccurate images in Figure 2A, 2C, 2E, 5A, 5C, 5E and 6C. The original article has now been corrected.

In detail, we incorrectly placed the data from the miR-NC-0h U251MG cell group in Figure 2A in the shNC-0h U251MG cell group in Figure 5A. For the two groups were both the NEGATIVE CONTROLS (NC) of the same cell line from the same experiment, and the results were indeed similar, the mistake resulted from carelessness during editing process. The same mistakes happened in Figure 2C (cell migration of miR-NC U251MG cell group), Figure 5C (cell migration of shNC U251MG cell group), and Figure 6C (cell migration of mimic-NC U251 cell group), which were all the negative controls (NC) of the same cell line from the same experiment. So was in Figure 2E (cell migration of miR-NC U87MG cell group) and in Figure 5E (cell migration of shNC-U87MG cell group).

For the images were mixed up in the NEGATIVE CONTROL (NC) groups of the same cell lines from the same experiments which indeed showed a similar performance, the correction doesn't affect the result and conclusion of the manuscript.
