Correction to: Pharm Res

<https://doi.org/10.1007/s11095-020-02891-z>

This erratum is to correct the name of the moiety responsible for the negativity of Lipoid S75. Such negativity is attributed to the phosphatidic acid moiety of Lipoid S75 rather the choline moiety. In ‘Discussion’ section, the third sentence of the first paragraph on page 12 should read as: ‘The observed negative charge with some of the formulated systems can be attributed to the migration of some surfactant molecules from the core of the prepared LNC to its outer corona, in addition to the negative charge imparted by the **phosphatidic acid** moiety of Lipoid S75.’
