Correction to: Philos Stud <https://doi.org/10.1007/s11098-019-01382-1>

In the original publication of the article, the last paragraph on page 15 under Section 4 that reads “Finally, for reasons.....outcomes to which it doesn’t.” was repeated. The correct paragraph is given below:

Finally, for reasons that we saw in Sect. 2, we do not think that appealing to vagueness will help with these problems. Suppose that some outcomes in S are borderline—it is neither determinately true that they are sharky nor determinately false that they are sharky—and that there is no higher-order vagueness. Should the agent follow the revelation approach when evaluating borderline outcomes, but not when evaluating sharky outcomes? If so, then in S there will be a sharp demarcation between outcomes to which the Revelation Approach applies and outcomes to which it doesn’t.
