Correction to: *Phytochem Rev*

<https://doi.org/10.1007/s11101-020-09736-y>

In the original publication, the paragraph “Aiming at valorizing Portuguese plants as source of bioactive compounds, Pinto and Silva (2020) reviewed their contribution to establish the chemical profile and to validate some of the health benefits claimed for some species namely *Calendula* species, *Pterospartum tridentatum* (L.) Willk. and several halophytes growing in Portugal” should read as “Aiming at valorizing Portuguese plants as source of bioactive compounds, Pinto and Silva (2020) reviewed their contribution to establish the chemical profile and to validate some of

the health benefits claimed for some species namely *Calendula* species, *Pterospartum tridentatum* (L.) Willk. and several halophytes growing in Portugal. They also focused on economically important species, which are at risk of being damaged by climate changes, such as *Olea europaea* L. and *Eucalyptus globulus* Labill., aiming at evaluating the impact that climate-change-related conditions can have in their metabolome profile”.

The original article has been corrected.
