**DOI 10.1007/s11103-010-9710-8**

Due to an unfortunate mistake, an incorrect version of Fig. 4 has been used in the above mentioned publication. The internal control of U6 in Fig. 4b was accidentally duplicated from Fig. 4a. The adjusted Fig. 4 with the correct U6 control is published below and should be treated as definitive by the reader.

The online version of the original article can be found under doi:10.1007/s11103-010-9710-8.

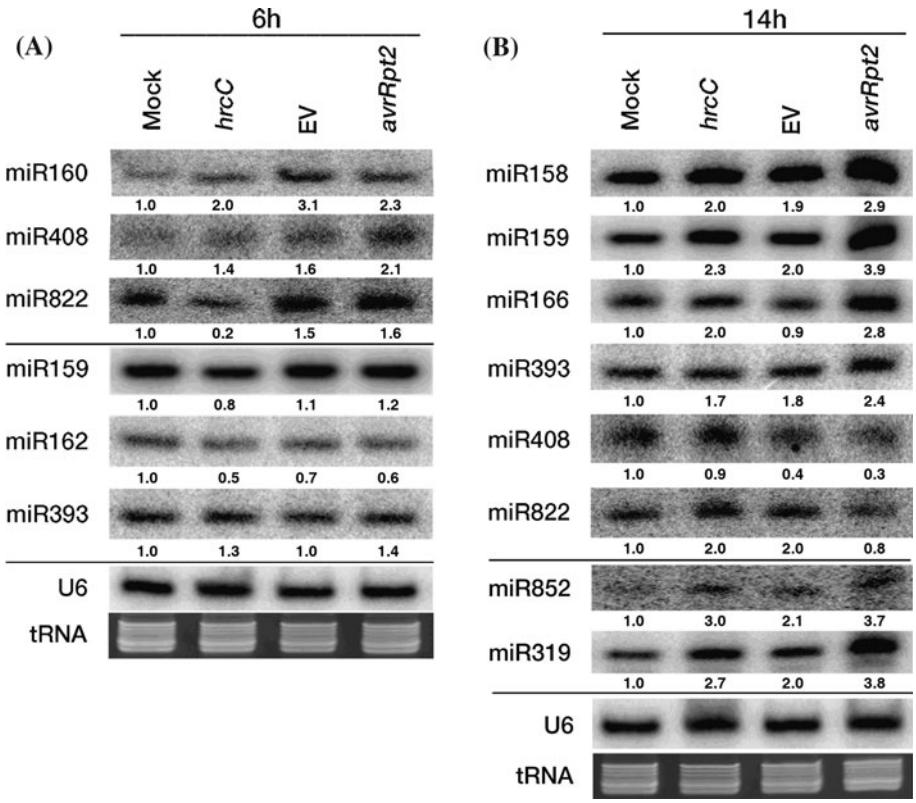

**Fig. 4** Small RNA Northern blot verification of some of the differentially expressed miRNAs detected by deep sequencing from the three bacterial pathogen infections and the mock controls at **a** 6-hpi and **b** 14-hpi. Similar results were obtained from two biological duplicates. U6 RNA was used as a control for measuring the relative amount of the bands (shown below each *panel*). Imagequant software version 2.1 was used for relative amount quantification (GE Healthcare Life Sciences)
