Correction to: Political Behavior (2019) 41(2):401–422

<https://doi.org/10.1007/s11109-018-9456-6>

The original version of this article unfortunately contained a mistake.

The gender dummy variable was mistakenly coded in reverse order. The interpretation treated it as (0 = Male, 1 = Female), while the actual coding was (0 = Female, 1 = Male). This had no influence on the substantive results for all other variables. The sign on the coefficients for the female dummy in Tables 2, 3, and 4 should be negative. The word “females” should be “males” on page 414, and “women” should be “men” on page 416.

The corrected replication code and data can be accessed at <https://dataverse.harvard.edu/dataset.xhtml?persistentId=doi:10.7910/DVN/0PVY33>

The authors would like to correct the error with this statement.
