Correction to: J Real Estate Finan Econ (2017) 54:97–116
<https://doi.org/10.1007/s11146-015-9538-8>

The article How Low Can House Prices Go? Estimating a Conservative Lower Bound, written by Alexander N. Bogin, Stephen D. Bruestle, and William M. Doerner, was originally published electronically on the publisher's internet portal (currently SpringerLink) on November 2015 without open access.

With the author(s)' decision to opt for Open Choice the copyright of the article changed on September 2019 to © *This is a U.S. government work and not under copyright protection in the U.S.; foreign copyright protection may apply 2019* and the article is forthwith distributed under the terms of the Creative Commons Attribution 4.0 International License (<http://creativecommons.org/licenses/by/4.0/>), which permits use, duplication, adaptation, distribution and reproduction in any medium or format, as long as you give appropriate credit to the original author(s) and the source, provide a link to the Creative Commons license and indicate if changes were made.

The original article has been corrected.

Open Access This article is distributed under the terms of the Creative Commons Attribution 4.0 International License (<http://creativecommons.org/licenses/by/4.0/>), which permits use, duplication, adaptation, distribution and reproduction in any medium or format, as long as you give appropriate credit to the original author(s) and the source, provide a link to the Creative Commons license and indicate if changes were made.

Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
