

## **Erratum to: Spillover effects of maternal education on child's health and health behavior**

**Daniel Kemptner · Jan Marcus**

Published online: 2 February 2013  
© Springer Science+Business Media New York 2013

### **Erratum to: Rev Econ Household DOI 10.1007/s11150-012-9161-x**

Unfortunately, the upper part of Table 6 has been repeated in table's lower part erroneously in the original publication.

The corrected version of Table 6 is shown here.

See specification 6 in Table 5. Specification 7 includes additional controls for maternal health, health behavior and fertility. Specification 8 tests upon dummies for 1, 2, 3, 4, 5 and 6+ siblings as instruments. Specification 9 includes also mothers without siblings, while specification 10 only considers mothers with 1, 2 or 3 siblings. Specification 11 is estimated with two-stage least squares. Specification 12 controls for the years of education of the mother's partner, specification 13 includes the logarithm of a 5 years average of household income and specification 14 controls for whether the child is on an academic track school. \*  $p < 0.1$ ; \*\*  $p < 0.05$ ; \*\*\*  $p < 0.01$
