Correction to: Research in Higher Education (2021) 62:392–402
<https://doi.org/10.1007/s11162-021-09633-z>

The original version of this article, unfortunately, contained a mistake in Table 3. In the last row of Table 3, the value "659" under the 5th column should read as "1659". The correct Table 3 is presented below.

The original article can be found online at <https://doi.org/10.1007/s11162-021-09633-z>.

Table 3 Statistics on the interactions between PeeDee and the treatment ECU-intending students

	(1)	(2)	(3)	(4)	(5)	(6)
	All treated students		First-generation students		Non-first-generation students	
	Mean (SD)	Range	Mean (SD)	Range	Mean (SD)	Range
Opt out	0.06 (0.23)	0–1	0.05 (0.21)	0–1	0.06 (0.24)	0–1
Messages sent by PeeDee to students	26.37 (7.51)	3–97	26.52 (7.68)	3–97	26.32 (7.45)	3–96
Messages sent by students to PeeDee	3.36 (4.53)	0–52	3.24 (4.98)	0–52	3.40 (4.37)	0–34
Number of days during which students sent messages to PeeDee	1.42 (1.71)	0–22	1.38 (1.94)	0–22	1.43 (1.63)	0–13
Observations	2205		546		1659	

According to t tests, there are no statistically significant differences between the first-generation and non-first-generation students in all four variables measuring the interactions with the chatbot. The number of treated students here is 2205 (not 2221) because 16 students in the treatment group assigned to receive text outreach didn't receive it and so they aren't included in the table

*** $p < 0.01$, ** $p < 0.05$, * $p < 0.1$
