

Reviews on biopolymers, ionic liquids, and related subjects can be found in Issue 9

Pharmacologically active salts and ionic liquids based on 2-hydroxyethylamines, aryl chalcogenides, and essential metals

A. N. Mirskova, S. N. Adamovich, R. G. Mirskov, and M. G. Voronkov

Quaternary ammonium derivatives of natural terpenoids. Synthesis and properties

V. E. Kataev, I. Yu. Strobykina, and L. Ya. Zakharova

Pectic polysaccharides: structure and properties

O. A. Patova, V. V. Golovchenko, and Yu. S. Ovodov

Schematic representation of a family of pectic polysaccharides

Interaction of cellulose and lignocellulose polymers with water and water-organic media

A. N. Prusov, S. M. Prusova, and A. G. Zakharov

Swollen cellulose matrix with incorporated solvent molecules
