Broadening the Awareness of Healthcare Professionals

Since 1978, the journal *Sexuality and Disability* has brought international perspective on healthcare issues and needs to promote the best assessment, intervention, training and education in the area of sexuality and disability. At present, the need continues around the globe and within specific settings to promote communication. Most important is that communication causes reflection, self-evaluation and re-assessment of needs. Of significance is that we continue efforts to not just talk but to apply our knowledge and awareness for meaningful change. There is plenty of work yet to be accomplished. Thank you for being a part of this on-going accomplishment.

Sexuality and Disability provides original impact articles addressing the mental health and medical aspects of sexuality in relation to rehabilitation, hospital, academic and community settings, publishing up-to-date articles, case studies, clinical practice reports, reviews, featured articles, historical articles, special grand rounds topics, brief research reports and survey data reports. Value benefit is provided to authors through worldwide electronic exposure and professional access, while readership gains from scholarly contributions to advance the field through research, best-practice and educational articles. The refined lens of individual contributions from the local and international community continues to deliver a wealth of information on the topic of sexuality and disability for the reader.
