

## **ERRATUM**

V. A. Barvashov and G. G. Boldyrev's paper entitled " Experimental and theoretical research on analytical models of piled-raft foundations" (No. 5, 2009) should read as follows on page 32: "These statements are critical to geotechnics, where building/structure settlements calculated in accordance with recommendations set forth in regulatory documents may be two-three times higher than actual values ..." (the remainder of the text is correct).
