Erratum to: Solar Phys (2015) 290: 1889–1896
DOI [10.1007/s11207-015-0732-x](https://doi.org/10.1007/s11207-015-0732-x)

The wording in the caption of Figure 5 is in conflict with the rest of the text. Specifically, the incorrect caption indicates a result that is the opposite of what is presented in the rest of the article. We apologise for this mistake. The caption should be changed to the following:

The absorption (left) and phase shift (degrees, right) of the $m = 0$ (top) and $m = 1$ (bottom) incident and outgoing f -mode waves interacting with a random ensemble of growing tube number of identical properties ($\beta = 1$: filled-black circles; $\beta = 0.1$: filled-red triangles; $\beta = 10$: filled-green squares) with the radiative (symbols only) and stress-free (symbols with lines) boundary conditions.

The results and the text of the main body remain correct.

The online version of the original article can be found under doi:[10.1007/s11207-015-0732-x](https://doi.org/10.1007/s11207-015-0732-x).
