Correction to: Water Resour Manag

<https://doi.org/10.1007/s11269-019-02268-x>

The original version of this article unfortunately contains mistakes introduced during the publishing process. The mistakes and corrections are described in the following list, the main error lies in Table 1, page 2402.

1) The values of horizontal and vertical correlation length are inverted. Therefore, the correct values should be:

- Horizontal Correlation Length = 1.5 m;
- Vertical Correlation Length = 5 m.

2) Moreover, the following sentences should be changed accordingly:

- Section 3.2 Heterogeneous Scenario, page 2408, third paragraph, third line from the beginning of the paragraph. The sentence “*When the bottom length is lower of about 3.3 ($B = 1.5$ m) and 1.7 ($B = 3$ m) times than the horizontal correlation length (5 m) of the spatial variability of the intrinsic permeability field, the distributions (Figs. 6 and 7) appear to be markedly right-skewed with a spread mostly oriented towards high values (B*

= 1.5 m in particular). Conversely, as the bottom length becomes higher than the horizontal correlation length of about 1.2 ($B = 6$ m) and 2.4 ($B = 12$ m) times, the distributions (Figs. 6 and 7) become more symmetric.” should be **changed with** “When the bottom length is equal to the horizontal correlation length (1.5 m) of the spatial variability of the intrinsic permeability field, the distributions (Figs. 6 and 7) appear to be markedly right-skewed with a spread mostly oriented towards high values. Conversely, as the bottom length becomes higher than the horizontal correlation length, the distributions (Figs. 6 and 7) become more symmetric.”;

- Conclusions, page 2413, fifth line from the beginning of the section. The part “...the bottom length is lower than the...” should be **changed with** “...the bottom length is equal to the...”.
