In the original publication, the last term of Eq. 1 (-28) should have been added at the end of Eq. 3., to read as shown below.

Our AMATA model is a modified version of the ITU model:

$$L = 20 \log_{10} f + 10n_o \log_{10} d + L_{\text{outer}} + X_a + L_f (m) - 28 \quad (3)$$
