Correction to: Oral Radiology

<https://doi.org/10.1007/s11282-017-0309-5>

Owing to an unfortunate mistake at Springer's end, the original article was published with errors which are corrected with this erratum as suggested by the author. The authors are not responsible for this procedural lapse.

In the original publication of the article, in "Results", the sentence that reads as "Unlike Tables 1 and 2 reports non-comments ... mobility at presentation as "No"." should

read as "Unlike Table 1, Table 2 recorded non-comments ... mobility at presentation as "No".".

Under the heading "Discussion", in ninth paragraph, the sentence that reads as "More than half ... cause numbness." should read as "More than half of the 13 lymphomas in Table 2 measured by advanced imaging modalities were of substantial dimensions, and although some can be expected to have reached the inferior orbital nerve, this may not be enough to cause numbness.".

The original article has also been updated.

The original article can be found online at <https://doi.org/10.1007/s11282-017-0309-5>.
