

Introduction to the Proceedings of the 6th Annual World Molecular Imaging Congress

On behalf of the World Molecular Imaging Congress (WMIC) and its founding organizations, (WMIS, FASMI, and ESMI) we are delighted to offer this special online supplement of the WMIC 2013 abstracts.

The abstract format for 2013 allowed for the inclusion of supplementary data and enhanced our ability to review the science and select the best abstracts for oral presentation. We received over 950 abstracts this year and awarded over 150 student travel stipends.

Over 1,500 attendees from over 32 countries presenting and discussing recent and diverse advances constituted a successful 6th World Molecular Imaging Congress. To search for particular authors or institutions, simply conduct a search via the search feature of Adobe Acrobat or the Adobe Free Reader.

We hope that those of you who attended the World Molecular Imaging Congress in Savannah enjoyed your time there. And for those of you who were unable to join us there or are new to the field, we hope to welcome you in the future. Our next World Molecular Imaging Congress will be held in Seoul, Korea September 17-20, 2014.

See you in Seoul!
