The original publication of this paper contains a mistake.

Data on Table 1 under TR and TL column have been interchanged: that is compounds 1-12 and their amounts refer to TL; compounds 1-8 and related amounts refer to TR (see Fig. 1). Consequently, for quantitation of compounds in paragraph “Chemical analysis” refer to this errata corriege. Correct table is shown in this paper.

Table 1 Quantitative composition of leaf (TL) and root (TR) hydroalcoholic extracts of *Taraxacum officinale* as detected by HPLC
