Fig. 6 **a** Correlation between the PFD + CSTR model parameters and hydraulic indicators combining the August and July 2017 data and **b** variation of hydraulic indicators and model parameters for the 2016 and

2017 tests. The missing values in the diagram (9th sequence in 2017.07 and 12th, 14th in 2016) were neglected because their coefficients of determination R^2 from simulation fitting were below 0.6
