Following the published article, we noticed an error duplication in Figure 5G “control” and “PGY-6” that was introduced during the revised process, with an attempt to replace it with higher-resolution images. Here we provide the original data in the first submitted manuscript (Figure 5G):

Figure 5 Bencaosomes exhibit medical effects *in vitro*. G, The localization of PGY-sRNA-6 in A549 cells was visualized by confocal microscopy. Cy3-conjugated PGY-sRNA-6 (red), Alexa Fluor 488 staining for F-actin (green), DAPI nuclear staining (blue) and merged images are indicated. A549 cells were collected after incubation with or without PGY-sRNA-6 or bencaosome for 6 h.

The online version of the original article can be found at <https://doi.org/10.1007/s11427-018-9508-0>
