The special issue *Stochastic Financial Economics* (published in two parts, volume 1 and 2) relates to the international conference *Stochastic Economics and Finance* held in Bergen, Norway, 12–13 June 2011. The conference was sponsored by the Norwegian Finance Market Fund (project *Stochastic Dynamics of Financial Markets*, 2010–2012).

From the joint mission of the scientific meeting and the journal *Mathematics and Financial Economics*—the strengthening of the links between mathematics and economics and finance—the idea for this special issue was born. We thank the Editor-in-chief Ivar Ekeland and his predecessor Elyès Jouini for their initiative and support in publishing this special issue.

All papers have undergone the standard anonymous refereeing process of *Mathematics* and *Financial Economics*.
