The authors examined the original data of their work and noticed some mistakes. The ELISA kit was bought from IBL Co. Germany instead of Abcam Co, UK. The anti-NLRP3, anti-IL-1 β and anti-caspase-1 primary antibodies were from CST Co, USA. There were 31 acute gout patients and 25 gout patients in remission who met the American Rheumatism Society (ACR) diagnostic criteria of gout in this study, and 7 normal individuals were recruited as controls. The authors sincerely apologize for the mistakes and confirm that the changes do not affect the scientific conclusion of the published work.
