Correction to: Metallurgical and Materials Transactions A
<https://doi.org/10.1007/s11661-018-4978-4>

In the original article there is an error in Figure 9(a). Following is the corrected Figure 9.

THE geometrical illustration of the tensile sample in Figure 4 was reprinted with permission from Ref. [42].

Fig. 9—(a) The average grain sizes (d) of microalloying Zn alloys as a function of Mg additions, (b) a three-dimensional (3D) model of eutectic-skeleton architectural structure (η -Zn + $\text{Mg}_2\text{Zn}_{11}$) present in the Zn (≥ 0.1) wt pct Mg alloy. Inset histogram in (a) shows the difference of d value distribution between pure Zn (before grain refinement) and microalloying Zn-Mg alloy (after grain refinement).
