The Editor-in-Chief has retracted this article because of concerns about the figures. Specifically:

- Figures 9a and 3c have been reproduced from Figures 2b and 2d of [1], respectively, despite representing SEM images after using different etching solutions;
- Figures 6b and 9c overlap with each other despite representing experiments under different conditions;
- Figures 6b and 9c have been reproduced from Figure 3c of [2], but are supposed to represent SEM images of silicon substrates after using different etching solutions.

The Editor-in-Chief no longer has confidence in the reliability of the data presented. Fahim Ullah agrees to this retraction. Sami Iqbal and Tong Zhang have not responded to correspondence from the Publisher related to the retraction wording. Kamran Hasrat has not responded to any correspondence from the Publisher about this retraction.

The online version of this article contains the full text of the retracted article as Supplementary Information.

Supplementary Information The online version supplementary material available at <https://doi.org/10.1007/s11664-020-08633-6>.
