Selections of the annual JPED Editor Choice Awards for 2018 have been made and are listed below. Information about how award selections are made can be found in the December 2015 issue of this Journal.

Peter Kainzbauer, Klaus W. Richter, Herbert Ipser, The Binary Bi-Rh Phase Diagram: Stable and Metastable Phases, *Phase Equilib. Diff.*, 2018, **39**(1), p 17–34

Lin Li, Libin Liu, Ligang Zhang, Lijun Zeng, Yun Zhao, Weimin Bai, Yurong Jiang, Phase Equilibria of the Ti-Al-Nb System at 1000, 1100 and 1150 °C, *Phase Equilib. Diff.*, 2018, **39**(5), p 549–561

Zhimin You, Min-Kyu Paek, In-Ho Jung, Critical Evaluation and Optimization of the Fe-N, Mn-N and Fe-Mn-N Systems, *Phase Equilib. Diff.*, 2018, **39**(5), p 650–677

Bo Sundman, Qing Chen, Yong Du, A Review of Calphad Modeling of Ordered Phases, *Phase Equilib. Diff.*, 2018, **39**(5), p 678–693

Esin A. Schulz, Abhishek Mehta, Irina V. Belova, Simultaneous Measurement of Isotope-Free Tracer Diffusion Coefficients and Interdiffusion Coefficients in the Cu-Ni System, *Phase Equilib. Diff.*, 2018, **39**(6), p 862–869

Letters confirming the awards have been sent via email to corresponding authors of each paper (underlined above). Co-authors can receive a copy of the letter from their corresponding author or by sending a request to jemorral@gmail.com.

In addition to the award, papers are given “Free Access” via the Springer/JPED website <http://www.springer.com/materials/journal/11669> or SpringerLink. “Free Access” means that papers can be viewed 24/7 worldwide by anyone with an internet connection. Normally there is a US\$ 3000 charge for “Free Access,” but for papers that have won this award the benefit is free.

Each year it is difficult to reduce the “short list” of 12 papers down to the allowed number of five. We at JPED thank all authors who have sent us their fine work and heartily congratulate all who received an Editor Choice Award for 2018. On this occasion, we wish to thank also our valued reviewers for their efforts to make JPED a quality publication.

John Morral
