**Erratum to: OBES SURG**  
**DOI 10.1007/s11695-015-1737-0**

There is an error in the results section of the abstract. The sentence which currently reads “Preoperatively, 34.6% (n=26) of patients reported subjective symptoms of reflux and/or required daily antisecretory therapy.” should read: “Preoperatively, 44.8% (n=26) of patients reported subjective symptoms of reflux and/or required daily antisecretory therapy.”
