Correction to: Obesity Surgery

<https://doi.org/10.1007/s11695-019-04241-4>

The first sentence of the article should read as follows:

Bona et al. (2019) have published a review and Bayesian meta-analysis to investigate the predictive utility of C-reactive protein (CRP) for detecting post-operative complications following bariatric surgery. [1]

The first two sentences of the third paragraph should read as follows:

We have re-analysed our data set at the York Teaching Hospital with this cut off (61 mg/l) to give a single centre perspective on this result. One hundred patients had a POD 1 CRP.
