

Errata

We are sorry for omitting Fig. 2 legend in:

In vitro micropropagation of four lupin species (T. Pniewski, J. Kapusta, A.B. Legocki).

It should be placed on page 420, No. 4 (2002)

Fig. 2. Rooting efficiency of lupin shoots after the 2nd and the 3rd passage of micropropagation.

Note: The data of rooting efficiency on LK2 medium supplemented with $0.1 \text{ mg} \cdot \text{dm}^{-3}$ NAA are not presented on the chart because no roots have been observed.
