Correction to: Journal of Cancer Survivorship

<https://doi.org/10.1007/s11764-021-01043-5>

The original version of the article has contained a mistake in table 1, 2 and result section.

The following changes: It replaces the bolding in Table 1 with new bolding to indicate the highest factor loadings. The note following Table 1 should read as follows, "Note: Highest factor loadings for each item are in bold. All items were retained with a factor loading of ≥ 0.4 ".

The title for Table 2 should read: "Screening tool questions with clinical cutoffs indicating need for referral". The text following this should sit above the table as directions included in the questionnaire.

The following key should be included under Table 2:

Key:

Items 1-7, 12-14 Psychosocial oncology.

Item 8 AYA

Items 9 -10 Case management

Items 11 Pastoral Care

Items 14-17 Physical Therapy

Items 18-22 Occupational Therapy

Items 23-25. Nutrition

The final correction is in the last line of the Results section. It currently reads "red" it should read "bold".

The updated table 1 and 2 is give below.
