

TMS

The Minerals, Metals & Materials Society

Participate in Upcoming TMS Specialty Meetings

Your Professional Partner for Career Advancement

In addition to broadly focused annual gatherings—like the TMS Annual Meeting and the Materials Science and Technology (MS&T) series—TMS offers a number of focused, specialty events that take an in-depth look at a particular area of materials science and engineering. Submit abstracts, register, or book housing now to be a part of these upcoming TMS specialty meetings, workshops, and short courses.

PRICM 8

The 8th Pacific Rim International Congress on Advanced Materials and Processing

August 4–9, 2013 • Hilton Waikoloa Village • Waikoloa, Hawaii

This triennial event is the eighth in a series of international forums dedicated to advanced materials and processing. Organized this year by TMS, PRICM-8 is jointly sponsored by the Chinese Society for Metals, Japan Institute of Metals, Korean Institute of Metals and Materials, and Materials Australia and rotates among these sponsoring organizations.

Liquid Metal Processing & Casting 2013 (LMPC 2013)

September 22–25, 2013 • University of Texas Austin • Austin, Texas

LMPC 2013 is a unique symposium that showcases the latest technological and scientific advances related to those industrial processes used to cast large ingots of highly alloyed metals. The symposium presents a blend of academic and industrial papers on topics including advances in controls and process simulation, ingot defect formation and characterization studies, and process parameter-material properties characterization.

TMS 2013 Industrial Aluminum Electrolysis Course

October 20–24, 2013 • Doha Marriott Hotel • Doha, Qatar

The definitive course on the theory and practice of primary aluminum production, this 4.5-day course will provide a comprehensive understanding of the electrolysis process, as well as an overview of the state-of-the-art aluminum production.

The 2nd International Congress on 3D Materials Science 2014

June 29–July 2, 2014 • L'Imperial Palace • Annecy, France

This meeting will provide the premier forum for presentations of current interest and significance to the three-dimensional characterization, visualization, quantitative analysis, modeling, and investigation of structure-property relationships of materials. It will provide an intimate environment for rich discussions and interactions amongst the key researchers in the world to not only assess the state-of-the-art within the various elements of 3D materials science, but to roadmap the key areas of future research as well.

8th International Symposium on Superalloy 718 and Derivatives

September 28–October 1, 2014 • Marriott City Center • Pittsburgh, Pennsylvania

This symposium will cover all aspects of metallurgical processing, materials behavior, and microstructural performance for a distinct class of 718 type superalloys and derivatives. This technical meeting will focus on Alloy 718 and Superalloys in this class relative to alloy and process development, production, product applications, trends, and the development of advanced modeling tools.
