Correction to:

JOM, Vol. 72, No. 5, 2020

<https://doi.org/10.1007/s11837-020-04108-5>

This correction is to correct Fig. 4. The scale bars were incorrect in the original version.

The original article can be found online at <https://doi.org/10.1007/s11837-020-04108-5>.

Fig. 4. SEM images of side surface of the tensile specimen after deformation with hydrogen pre-charging (condition B). The left row represents C3, which was interrupted at true strain equal to (a) 0.05, (b) 0.1 (c) 0.2, and (d) fractured. The right row is N3, which was interrupted at true strain equal to (e) 0.05, (f) 0.1 (g) 0.2 and (h) fractured. The phase fractions are denoted on the upper right of each image.
