The original version of this article¹ unfortunately contained mistakes in the title and Figure 2 legend. The changes are underlined as follows:

Article Title:

Increased Expression of Beclin-1-Dependent Autophagy Protects Against Beta-amyloid-Induced Cell Injury in PC12 Cells

Figure 2 legend:

Fig. 2 A β_{1-42} -induced Beclin-1 expression was further upregulated by rapamycin but was downregulated by 3-MA.

Cells were pretreated with or without 3-MA or rapamycin for 1 h before treatment with 1.25 μ M A β_{1-42} for 3–72 h. Beclin-1 expression was measured by flow cytometry. The untreated cells were used as control. The data of the experiments were expressed as mean $\pm$ SD; * P <0.05 compared with A β -treated group
