Retraction Note: Journal of Molecular Neuroscience (2019) 68:275–286
<https://doi.org/10.1007/s12031-019-01303-1>

The Editor-in-Chief has retracted this article. After publication, the corresponding author has informed the journal that experiments were performed by a third party laboratory and that they may have provided the wrong results, which will be difficult to verify, and requested the retraction of the article. Further concerns have been raised that the panels shown in Fig. 6C appear to be similar to panels from:

- Figure 3B from Liu and Yu (2018); and
- Figure 2 from He et al. (2019).

The Editor-in-Chief, after consultation with the publisher, no longer considers the data underlying this article to be reliable. The authors did not respond to further correspondence regarding this retraction notice.
