Unfortunately, the online published article has an error in the references of the figures in the text under the Results section. Instead of referring to Fig. 3 (Reported adverse events), we refer to Fig. 2 (Digital thermal image of a test subject). The correct figure referred should be Fig. 3.

Furthermore, the reference to Fig. 1 in the Statistical section and the reference to Fig. 3 in the Result section, were mistakenly added in the editing of the final version and this was missed during the final proof reading process.

In the Subjects and methods section, the Fig. 1 (Schematic drawing of cooling device) refers to The air-cooling

device subsection and Fig. 2 (Digital thermal image of a test subject) to the Methods subsection.
