The regular participants to the ICCNS sponsored workshops on the CCN family of genes have had the opportunity to appreciate the considerable amount of work that Annick has invested to make the ICCNS meetings unforgettable social and scientific events.

Not so many know that her dedication to having the CCN field receive the recognition it deserves was further expanded into building the success of the society journal that is JCCS.

Her genuine interest in the biology of CCN proteins, and her continued commitment to deliver attractive JCCS printed issues, has been pivotal in the design of the current JCCS cover, a journal that is appreciated as the vector of progress, discovery and communication without which CCN research could not prosper.

The participation of Annick, helping to bridge the efforts that are deployed to build fruitful interactions between the International CCN Society and its international Journal of

Cell Communication and Signaling, has been instrumental to our scientific recognition and integrity.

Since the inception of the ICCNS and JCCS Annick has been essential to their success.

For these reasons I am delighted to offer Annick the most deserving position of Administrative Manager and Coordinator of JCCS, a nomination that has been enthusiastically approved by our most supportive colleagues in the field of cellular biosignaling, and Springer publisher.

Marseille, Feb 29th, 2020.

Bernard Perbal.

JCCS Editor in Chief.
