The Editor-in-Chief has retracted this article (Zhang et al. 2020). The article was accepted as part of a guest-edited special issue in Current Psychology. Before the special issue was finalized, the Editor-in-Chief detected problems with editorial handling and peer review and decided not to proceed with the special issue. Post publication peer review found the following issues:

- The new research conducted is not clear.
- There is no linkage to the topic in the title, older adults and artificial intelligence.
- The conclusion is insufficient to the topic of community health management and AI for older adults.

The Editor-in-Chief no longer has confidence in the reliability of the work presented.

Dr. Zehao Zhang does not agree to this retraction. All other authors of this paper have not responded to any correspondence from the Editor about this retraction.

The online version of this article contains the full text of the retracted article as Supplementary Information.

Supplementary Information The online version of this article (<https://doi.org/10.1007/s12144-020-00855-5>) contains supplementary material, which is available to authorized users.
