Correction to: Child Indicators Research
<https://doi.org/10.1007/s12187-019-09633-7>

The below statements are missing in the original article.

Ethics Approval and consent to participate:

Ethical permission for the study was granted by The Joint South London and Maudsley and The Institute of Psychiatry NHS Research Ethics Committee (reference 05/Q0706/297). Caregivers and their children indicated their informed consent for the child's participation in the study by return of completed questionnaires. All questionnaires were anonymous unless caregivers provided identifying contact information for the family.

Availability of data and material:

This study reports on data collected as a part of the “London Child Health and Development Study. These data cannot be made available publicly due to an ethical restriction limiting access to this data to members of the research team. Anonymised data from the studies are held by the Principal Investigator Associate Professor Kristin Laurens (kristin.laurens@kcl.ac.uk). Those interested in using these data should contact Associate Professor Laurens to request appropriate approval for access.

Competing Interests:

None.

Funding:

The research was supported by funding awarded to KRL from a National Institute for Health Research Career Development Fellowship (CDF/08/01/015) (<https://www.nihr.ac.uk/funding-and-support/>), Bial Foundation Research Grants (36/06; 194/12) (<https://www.bial.com/en>), a NARSAD Young Investigator Award (2005) (<https://www.bbrfoundation.org/grants-prizes/narsad-young-investigator-grants>), the British Medical Association Margaret Temple Award for Schizophrenia Research (2006) (<https://www.bma.org.uk>), and the Schizophrenia Research Institute (<http://www.schizophreniaresearch.org.au>) using an infrastructure grant from the New South Wales Ministry of Health. KRL was supported by an Australian Research Council Future Fellowship (FT170100294) (<https://www.arc.gov.au/grants/discovery-program/future-fellowships>). The funding agencies had no involvement in any aspect of the study, or the preparation of this manuscript.

Authors’ contributions:

MJH and KRL contributed equally to the conceptualization, design and preparation of the manuscript. KRL collected all data and MJH conducted all analyses.

Acknowledgements:

We thank the children, caregivers, and primary schools who participated in the study, and the researchers and students who contributed to data collection, particularly Sophie West and Glenn Mould.
