Retraction note to: KSCE Journal of Civil Engineering (2020) 24(3):703-714

DOI 10.1007/s12205-020-1163-2

The authors have retracted the article Zheng et al. (2020). After publication, they became aware that the method proposed fails to express the real-time position of the concrete bucket, which leads to the incorrect real-time position of impact space. Because the description of the real-time position is not accurate in the Methods section, the results on exposure frequency are unreliable. All authors agree with this retraction.
